Determinan kemampuan ibu merawat anak pasca rawat inap indikasi diare di wilayah kerja puskesmas Sumpalsari Kabupaten Jember, 2018

viii + 112 hal + 1 bagan + 12 tabel + 15 lampiran

Abstrak

Kemampuan (ability) berarti kapasitas seorang individu untuk melakukan beragam tugas dalam suatu pekerjaan. Determinan kemampuan yaitu frekuensi penyuluhan, sumber informasi, dan media penyuluhan. Tujuan penelitian ini untuk mengetahui determinan kemampuan ibu merawat anak pasca rawat inap indikasi diare di Wilayah kerja Puskesmas Sumpalsari Kabupaten Jember. Desain penelitian ini adalah korelasional dengan pendekatan *cross sectional*. Populasi pada penelitian ini adalah ibu yang mempunyai anak batita yang pernah di rawat inap indikasi diare. Sampel yang diambil adalah 30 ibu yang di ambil dengan *kuota sampling*. Analisa data menggunakan *Spearman's Rho* hasil penelitian adanya hubungan frekuensi penyuluhan nilai  $P\ value = 0,002$  ;  $r = 0,534$ . Sumber informasi  $P\ value = 0,002$  ;  $r = 0,544$ . Media penyuluhan  $P\ value = 0,164$  ;  $r = 0,261$  sehingga dapat disimpulkan bahwa sumber informasi berkolerasi paling tinggi dengan kemampuan ibu merawat anak pasca rawat inap indikasi diare di wilayah kerja Puskesmas Sumpalsari Kabupaten Jember. Maka hasil rekomendasi jika lebih banyak mendapatkan sumber informasi tentang diare pada anak maka semakin meningkatkan kemampuan ibu dalam merawat anak pasca rawat inap indikasi diare.

Kata Kunci: Diare, Kemampuan ibu

*Determinants mother's ability inpatient care for children after diarrhea indication  
Sumbersari health centers in the region of Jember, 2018*

*viii + 112 page + 1 draft + 12 table + 15 attachment*

*Capability means the capacity of an individual to perform various tasks in a job, The determinant is the frequency extension capabilities, resources, and media outreach. The purpose of this study to determine mother's ability inpatient care for children after hospitalization indication of diarrhea in Puskesmas working area Sumbersari Jember. A design of this study is of correlational with the approach of cross sectional .Percent of the population on this research was the mother whose children had young babies who ever even in the as an in patient an indication them suffered from diarrhea acute .Samples to be taken is 30 women in the later stages in accordance the criteria used to group of researchers from .The technique of over the withdrawal of funds samples to of this research is at least as much as the sampling method of .Which is done based on data using spearman's rho page. P values obtained frequency value extension = 0.002 with correlation coefficient 0.534. Resources P value = 0.002 with correlation coefficient 0,544. Media outreach P value = 0.164 with correlation coefficient 0.261 so that it can be concluded that there is a relationship between the frequency of counseling and resources with the mother's ability to care for children after hospitalization indication of diarrhea and in Puskesmas Sumbersari Jember. Extension of diarrhea in children is important for mothers to improve the ability of mothers in caring for post-hospitalization indication of diarrhea.*
