Hubungan Perilaku Ibu Dengan Kemampuan *Toilet Training* Pada Anak Usia *Toddler* Di Dusun Krajan Desa Sukorejo Kecamatan Bangsalsari Jember, 2017

xiii + 64 hal + 1 skema + 5 tabel + 12 lampiran

### Abstrak

*Toilet training* secara umum dapat dilaksanakan pada setiap anak yang sudah mulai memasuki fase kemandirian pada anak usia 18-24 bulan. Kemampuan *toilet training* anak dapat dipengaruhi oleh beberapa faktor salah satunya adalah perilaku ibu dimana ibu berperan penting dalam mengajarkan *toilet training*. Tujuannya untuk mengetahui apakah ada hubungan perilaku ibu dengan kemampuan *toilet training* pada anak *toddler*. Penelitian ini menggunakan desain *korelasidengan* rancangan bangun *crosssectional*. Populasi penelitian adalah ibu yang memiliki anak usia *toddler* yang berada di Dusun Krajan Desa Sukorejo Kecamatan Bangsalsari Jember dengan sampel 65 orang. Instrumen yang digunakan adalah *skala likert* dan *guttman*. Hasil penelitian untuk variabel independen yaitu perilaku ibu terhadap kemampuan *toilet training* dalam rumah tangga sebagian besar ibu berperilaku baik 44 orang (67.7%) dan ibu yang berperilaku kurang baik 21 orang (32.3%). Hasil penelitian untuk variabel dependen yaitu kemampuan *toilet training* pada anak *toddler* sebagian besar tidak mampu 40 anak (61.5%), dan anak yang mampu 25 orang (38.5%). Berdasarkan hasil analisis *uji chi square* didapat *P valuenya* = 0,000 ( $\alpha < 0,05$ ). Kesimpulan penelitian ini berarti ada hubungan perilaku ibu dengan kemampuan *toilet training* pada anak usia *toddler* Di dusun Krajan Desa Sukorejo Kecamatan Bangsalsari Jember. Direkomendasikan pada perilaku ibu hendaknya memperhatikan dan memilih betul-betul tindakan untuk perkembangan anak.

Kata kunci : Perilaku Ibu, Kemampuan *Toilet training*, Anak *Toddler*

The Relationship of Mother's Behavior with *Toilet Training* Ability in *Toddler* at Krajan Sukorejo  
Bangsalsari Jember, 2017

xiii + 64 pages + 1 schemes + 5 tables + 12 attachments

*Abstract*

*Toilet training in general can be applied on every child who has started the stasis phase in children aged 18-24 months. The ability of children's toilet training can be influenced by several factors, one of the problem is the mother's behavior in which the mother plays an important role in teaching toilet training. The goal of this research is to find out whether there is a relationship of mother behavior with the toilet training ability in toddler. This research uses correlation design with cross sectional building design. The population of this research are mothers with toddler age children who live in Krajan Sukorejo Bangsalsari Jember with the sample of 65 people. The instruments used are likert scale and guttman. The independent variable is mother's behavior with toilet training ability in household. The result of the research in independent variable is most of mothers with well behaved were 44 people (67.7%) and mothers with less behave were 21 people (32.3%). The dependent variable is the toilet training ability on toddler. The result of the research for dependent variable is the children with less ability were 40 children (61.5%), and children with average ability were 25 people (38.5%). Based on the result of chi square test analysis obtained P value = 0,000 ( $\alpha < 0,05$ ). The conclusion of this study is that there is a relationship of mother's behavior with toilet training ability in toddler children at Krajan Sukorejo Bangsalsari Jember. It recommended for mother to pay attention in choosing the appropriate treatment for children's development.*
