Hubungan Dukungan Orang Tua Dengan Perilaku Penggunaan *Smartphone* Pada Anak Remaja Di SMP Negeri 13 Jember

XV+100 halaman+ 1 bagan + 15 tabel + 19 lampiran

Abstrak

Dukungan orang tua merupakan salah satu faktor penting yang mempengaruhi perilaku anak menggunakan *smartphone*. Kurangnya perhatian orang tua dan kurangnya pengawasaan anak dalam menggunakan *smartphone* akan berdampak negatif terhadap anak dan keluarga. Tujuan penelitian ini untuk mengetahui hubungan dukungan orang tua dengan perilaku penggunaan *smartphone* pada anak remaja di SMPN 13 Jember Kabupaten Jember. Metode penelitian ini menggunakan desain *korelasi* dengan pendekatan *cross sectional*. Populasi siswa kelas 7 yang sekolah di SMPN 13 Jember dengan jumlah siswa 139 dan sampel dipilih dengan cara *Proportional Random Sampling* dan *Simple Random Sampling* pada 103 sampel siswa kelas 7. Hasil penelitian ini didapatkan 51,5% dukungan orang terhadap anak kurang baik sedangkan untuk perilaku didapatkan 52,4% siswa baik dalam menggunakan *smartphone*. Dari hasil *Spearman rank (Rho)* diperoleh *p value* $0,000 \leq 0,05$ sehingga H_1 diterima, artinya ada hubungan antara dukungan orang tua dengan perilaku penggunaan *smartphone* pada siswa kelas 7 di SMPN 13 Jember dengan koefisien korelasi negatif. Rekomendasi penelitian yaitu peningkatan dalam memberikan dukungan orang tua yang sangat penting dalam pembentukan perilaku anak menggunakan *smartphone*, orang tua merupakan tempat interaksi pertama kali bagi anak.

Kata kunci: Dukungan Orang Tua, Perilaku, *Smartphone*

The Relationship Between Parental Support And The Behavior Of Using Smartphone In Adolescents In SMPN 13 Jember

XV + 100 pages + 1 chart + 15 tables + 19 attachments

Abstract

Parental support is one of the important factors that influence children's behavior in using smartphone. Lack of parental attention and lack of supervision to children in using smartphone will have a negative impact on children and families. The purpose of this study to determine the relationship between parental support and the behavior of using smartphone in adolescents in SMPN 13 Jember, Jember regency. This research method is correlation research with cross sectional approach. The population of this study were seventh grade students at SMPN 13 Jember with the number of students was 139 students and the sample was selected by Proportional Random Sampling and Simple Random Sampling on 103 samples of seventh grade students. The result of this study was 51,5% of students which less of parental support while for the behavior 52,4% of students were found that they were good in using smartphone. From the results of Spearman rank (ρ) obtained p value $0,000 \leq 0,05$ so H_1 accepted, it means that there is a relationship between parental support with the behavior of using smartphone in seventh grade students at SMPN 13 Jember with negative correlation coefficient. The research recommendation is an improvement in providing parent support that is very important in the formation of children's behavior in using smartphone, parents are the first interaction place for children.

Keywords: Parent Support, Behavior, Smartphone
