Faktor-faktor Yang Mempengaruhi Kunjungan Lansia Ke Posyandu Lansia Senja Bugar Di Desa Silo, Kecamatan Silo, Kabupaten Jember, 2018

Xviii + 114 hal + 1 bagan + 16 tabel + 4 foto + 19 lampiran

Abstrak

Introduksi : Posyandu lansia adalah pelayanan kesehatan khusus untuk seseorang yang telah berusia lanjut. Kunjungan lansia ke posyandu dipengaruhi oleh beberapa faktor seperti pengetahuan, keterjangkauan posyandu dari rumah, dukungan keluarga dan keluhan fisik. Tujuan penelitian ini untuk mengetahui hubungan faktor tersebut dengan kunjungan lansia ke posyandu lansia Senja Bugar di Desa Silo, Kecamatan Silo, Kabupaten Jember.

Metode : Desain penelitian ini adalah korelasional dengan pendekatan *cross sectional*. Populasi pada penelitian ini adalah anggota dari posyandu lansia senja bugar yang berjumlah 76 lansia. Sampel yang diambil adalah 64 lansia yang sesuai kriteria peneliti. Teknik pengambilan sampel pada penelitian ini adalah *non-probability sampling*. Analisa data menggunakan *Spearman's Rho*

Hasil : didapatkan nilai *P value* pengetahuan = 0,000 dengan nilai koefisien korelasi 0,439. Keterjangkauan posyandu dari rumah *P value* = 0,001 dengan nilai koefisien korelasi 0,394. Dukungan keluarga *P value* = 0,000 dengan nilai koefisien korelasi 0,479 dan keluhan fisik *P value* = 0,000 dengan nilai koefisien korelasi 0,470 sehingga dapat disimpulkan bahwa ada hubungan antara faktor-faktor tersebut dengan kunjungan lansia ke posyandu lansia senja bugar di Desa Silo Kecamatan Silo Kabupaten Jember dengan kekuatan hubungan sedang.

Daiskusi : Posyandu sangat penting bagi lansia, direkomendasikan untuk lansia supaya rutin berkunjung ke posyandu.

Kata Kunci: Lansia, Posyandu Lansia

The factors that affect a visit of the elderly to integrated health service for elderly Senja Bugar Silo, 2018

Xviii + 114 page + 1 draft + 16 table + 4 photo+ 19 attachment

Abstract

Introduction : Elderly is a person aged 60 years old or above. Health service for elderly is a special health services for elderly. A visit to health Service for elderly is influenced by several factors such as knowledge, affordability, family support and physical disorder. The purpose of this study to determine the relationship of these factors with a visit to health service for elderly in Silo.

Method: The research design was correlational with cross sectional approach. The population in this study is a member of health service for elderly, amounting to 76 elderly. The respondents were 64 elderly who fit the researchers criteria. The sampling technique in this study was a non-probability sampling. Data were analyzed using Spearman's Rho.

Result : P values obtained knowledge value = 0.000 with correlation coefficient 0.439. Health service for elderly affordability P value = 0.001 with correlation coefficient 0.394. Family support P value = 0.000 with correlation coefficient 0.479 and physical complaints P value = 0.000 with correlation coefficient 0,470 so it can be concluded that there is a relationship between these factors with a visit elderly to health service for elderly in the Silo with medium the strength of the relationship.

Discussion : Since this service is very important to elderly, the elderly are recommended to visit the health service for elderly.

Key Words: Elderly, health service for elderly.
