Teachers can literally be interpreted as educators / teachers of a discipline of science. In the Indonesian language teachers refer in terms of professional educators with the task of teaching, educating, directing, guiding, assessing, training and evaluating learners. Understanding in general can be defined as educators and teachers Early childhood education of the school / formal education, primary and secondary education. Salary salary is not the only factor affecting the professional performance of teachers, many factors that affect the performance of teachers include educational technical skills, but also must have a personality So that it can be a role model for students, family and society. Therefore, it is appropriate that competent professional teachers and achievers in their fields deserve what should be their right. Based on the above, in this Final Project the authors conduct research with Title "PE COMPARATIVE RESULTS OF WORKING ACCORDING TOPSIS METHOD (Technique For Others Reference by Similarity to Ideal Solution) AND SAW (Simple Additive Weighting) ON SMART TEACHER ELEMENTS ACHIEVING SCHOOL LEVEL BASED ON GUIDELINES OF KEMENDIKBUD "

Keywords*: Teacher, SAW, TOPSIS*

ABSTRAK

PERBANDINGAN HASIL AKURASI KERJA METODE TOPSIS(Technique For Others Reference by Similarity to Ideal Solution) DAN SAW(Simple Additive Weighting) PADA PEMILIHAN GURU SMP BERPRESTASI TINGKAT SEKOLAH BERDASARKAN PEDOMAN KEMENDIKBUD
