Judul : Kinerja Desa Tangguh Bencana Dalam Mengatasi Covid-19 di Desa Lojejer
Kecamatan Wuluhan

Penelitian ini bertujuan mendeskripsikan mengenai Kinerja Desa Tangguh Bencana Dalam Mengatasi Covid-19 di Desa Lojejer Kecamatan Wuluhan mengenai upaya membangun kesiapan pemerintah desa dan masyarakat untuk mengatasi bencana non alam yaitu virus Covid-19. Tujuan dari adanya program Destana yaitu bagian dari upaya pemerintah untuk mengatasi wabah virus Covid-19 dan menekan angka korban yang terpapar virus Covid-19. Metode yang digunakan dalam penelitian ini yaitu pendekatan kualitatif, sumber data yang diperoleh dari Ketua Pelaksana program Destana. Pengumpulan data melalui wawancara, observasi, serta dokumentasi. Hasil dari pembahasan dalam mengatasi Covid-19 di Desa Lojejer ada beberapa aspek diantaranya, kualitas kinerja, kuantitas, ketepatan waktu, efektifitas, kemandirian komitmen kerja. Dalam melaksanakan program Destana dalam mengatasi Covid-19 di Desa Lojejer dikatakan efektif karena dari yang tadinya menjadi zona orange menjadi zona hijau yang artinya angka korban yang terpapar Covid-19 menurun dan dapat memutus rantai penyebaran Covid-19, tetapi terlihat beberapa masyarakat yang tidak menggunakan masker saat di jalan atau saat keluar rumah itu bisa menimbulkan terpaparnya Covid-19. Adanya program pemerintah terkait percepatan vaksin penduduk Desa juga didukung oleh Desa agar semua penduduk Desa Lojejer mendapatkan vaksin sehingga penyebaran virus Covid-19 dapat teratasi. Aspek lainnya seperti social ekonomi masyarakat terkait dampak yang ditimbulkan oleh Pandemi juga menjadi kajian program dari Destana agar kesehatan, social, ekonomi masyarakat pulih kembali. Desa Lojejer telah memiliki upaya-upaya awal untuk menyusun kebijakan Pengurangan Resiko Bencana (PRB) di tingkat Desa atau kelurahan. Desa Lojejer juga telah membentuk forum Pengurangan Resiko Bencana (PRB) yang beranggotakan tokoh-tokoh masyarakat dari perwakilan masyarakat desa. Membentuk posko-posko bencana. Adanya upaya-upaya awal untuk membentuk tim relawan Penanggulangan Bencana (PB) Desa/Kelurahan khususnya mengatasi pandemi Covid-19 seperti relawan pemulasaran jenazah, relawan dapur umum, dan lainnya. Desa memiliki upaya-upaya awal untuk meningkatkan kapasitas kesiapsiagaan serta tanggap bencana.

Kata Kunci: Kinerja, Desa Tangguh Bencana, Covid-19

Title : Disaster Resilient Village Performance in Overcoming Covid-19 in Lojejer Village, Wuluhan District.

This study aims to describe the Performance of Disaster Resilient Villages in Overcoming Covid-19 in Lojejer Village, Wuluhan District regarding efforts to build village government and community readiness to overcome non-natural disasters, namely the Covid-19 virus. The purpose of the Destana program is part of the government's efforts to overcome the Covid-19 virus outbreak and reduce the number of victims exposed to the Covid-19 virus. The method used in this study is a qualitative approach, the source of the data obtained from the Chief Executive of the Destana program. Collecting data through interviews, observation, and documentation. The results of the discussion in overcoming Covid-19 in Lojejer Village contained several aspects including performance quality, quantity, timeliness, effectiveness, independence in work commitment. In carrying out the Destana program in overcoming Covid-19 in Lojejer Village, it is said to be effective because from what was previously an orange zone to a green zone, which means the number of victims exposed to Covid-19 has decreased and can break the chain of Covid-19 spread, but it seems that some people are not Masks when walking or when leaving the house can cause exposure to Covid-19. The government program related to the acceleration of village residents' vaccines is also supported by the village so that all residents of Lojejer Village get the vaccine so that the spread of the Covid-19 virus can be overcome. Other aspects such as the socio-economic community related to the impact caused by the pandemic are also a program study from Destana so that the health, social and economic conditions of the community recover. . Lojejer Village has had initial efforts to develop a policy for Disaster Risk Reduction (DRR) at the village or sub-district level. Lojejer Village has also established a Disaster Risk Reduction (DRR) forum consisting of community leaders from village community representatives. Establishing disaster posts. There were initial efforts to form a Village/Kelurahan Disaster Management (PB) volunteer team, especially to deal with the Covid-19 pandemic, such as corpse relocation volunteers, soup kitchen volunteers, and others. Villages have made initial efforts to increase their capacity for disaster preparedness and response.
