

## Daftar Pustaka

Brusca, S., R. Lanzafame & M. Messina. 2014. "Design of a vertical-axis wind turbine: how the aspect ratio affects the turbine's performance". *International Journal of Energy and Environmental Engineering*, 5:333 – 340.

Community and Regional Resilience Institute (CARRI). (2013). Definitions of community resilience: An analysis. community and regional resilience institute (CARRI).

Desriansyah, Analisis Teknis Sudu Kincir Angin Tipe Sumbu Horizontal Dari Bahan Fibreglass, Indralaya,, 2006.

Hau, Eric. 2006. *Wind Turbines : Fundamentals, Technologies, Applications, Economics*. Edisi 2. Springer: Berlin, Germany

Hasyim Asy'ari dkk, " Desain Prototipe Pembangkit Listrik Tenaga Angin Dengan Turbin Horisontal Dan Generator Magnet Permanen Tipe Axial Kecepatan Rendah" Prosiding Seminar Nasional Aplikasi Sains & Teknologi (SNAST) Periode III ISSN: 1979-911X, Yogyakarta, 3 November 2012

Hassan, Islam M., Ahmad M. Ali, Mahdi S. Al-Ajmi & Taher G. Abu El-Yazied. 2015. "Effect of Number of Blades and Blade Chord Length on"

Moh. Amien. (1984). Buku Pedoman Praktikum dan Manual Laboratorium Pendidikan IPA Umum (General Science). Jakarta : Departemen Pendidikan dan Kebudayaan.

Puji Setiono. 2006. Pemanfaatan Alternator Mobil Sebagai Pembangkit Listrik Tenaga Angin .Teknik Elektro, Fakultas Teknik niversitas Negeri Semarang.

Paraschivoiu, Ion. 2002. *Wind Turbine Design: With Emphasis on Darrieus Concept*. Presses Internationales Polytechnique. Montreal, Canada

*The Performance of Darrieus Wind Turbine*". *American Journal of Mechanical Engineering and Automation* 2, 1:16 – 25

Van Driel, J.H., Beijaard, D., Verloop, N., 2001. *Professional development and reform in science education: The role of teachers' practical knowledge*. *J. Res. Sci. Teach.* 38, 137–158.
