PREFACE

In the name of Allah, the most merciful is all-loving. All praise to God, the Lord of the universe, the one who gives me the opportunity and strength to complete this thesis.

My thesis focuses on the correlation between the self-concept of English pronunciation and speaking mastery of the fifth-semester students at Universitas Muhammadiyah Jember. This thesis is written to expect to be useful for Indonesian EFL students to find out whether there is a correlation between self-concept of English pronunciation. In addition, hopefully, the result of this study would anticipate the readers of their psychology of the self-concept of English pronunciation's obstacles and motivate them to improve their speaking ability.
