Hubungan Pemahaman Masyarakat Tentang BPJS Dengan Pemanfaatan Pelayanan Kesehatan Di Puskesmas Sumberbaru Jember viii + 62 halaman + 11 tabel + 1 diagram + 7 Lampiran

Abstrak

Salah satu faktor yang dapat membantu masyarakat dalam hal kesehatan ialah BPJS. BPJS berperan penting dalam membantu masyarakat dalam berobat. Namun kenyataan yang terjadi di lapangan masih banyak masyarakat yang kurang paham mengenai apa itu BPJS dan bagaimana cara kerjanya. Penelitian ini bertujuan untuk mengetahui hubungan pemahaman tentang BPJS dengan pemanfaatan pelayanan kesehatan di Puskesmas Sumberbaru Jember. Metode penelitian menggunakan metode *Cross sectional*. Sample sebanyak 273 responden menggunakan metode *Cross sectional* dengan teknik sampling menggunakan *purposive Sampling*. Hasil penelitian menunjukkan bahwa sebagian besar responden menyatakan pemahaman masyarakat tentang bpjs 178 responden (65,2%) menyatakan baik, yaitu dari sebanyak 273 responden sedangkan sebagian kecil 95 responden (34,8%) menyatakan pemahaman masyarakat tentang bpjs di puskesmas sumberbaru kurang baik. Perlu mengadakan dan memberikan edukasi tentang pemahaman BPJS terhadap masyarakat agar masyarakat lebih paham akan pentingnya BPJS kesehatan.

The Relationship between Public Understanding of BPJS and the Utilization of Health Services at the Sumberbaru Health Center Jember

viii + 62 pages + 11 tables + 1 diagram + 7 Appendices

Abstract

One of the factors that can help the community in terms of health is BPJS. BPJS plays an important role in helping the community in getting treatment. However, the reality in the field is that there are still many people who do not understand what BPJS is and how it works. This study aims to determine the relationship between understanding BPJS and the utilization of health services at the Sumberbaru Health Center, Jember. The research method used cross sectional method. The sample is 273 respondents using the cross sectional method with the sampling technique using purposive sampling. The results showed that most of the respondents stated that the public's understanding of BPJS 178 respondents (65.2%) said it was good, that is from 273 respondents while a small portion of 95 respondents (34.8%) stated that the public's understanding of BPJS at the Sumberbaru Health Center was not good. It is necessary to organize and provide education about the understanding of BPJS to the community so that people understand more about the importance of BPJS health.

Key Words : Community understanding, BPJS, Utilization of Health Services
