In the Name of Allah, the Most Beneficent and the Most Merciful. All the praises to Allah, the Lord of the universe for giving me a chance and power to finish this thesis under the title “An Analysis of Dental Fricative Pronunciation On Narrative Text at Madrasah Aliyah Negeri Bondowoso”. This thesis is written to make the readers understand about consonant dental fricative and factors influence the students in producing consonant dental fricative in narrative text made by English club students of Madrasah Aliyah Negeri Bondowoso. Hopefully this research can be giving teachers an overview about students’ pronunciation of consonant dental fricative in narrative text. The researcher realize that this thesis is far from being perfect. Therefore, suggestion and comment are needed to make this thesis better. The researcher also would like to thank to all of those who have given the contribution so this thesis can be finished.
