Hubungan Tingkat Pengetahuan Covid-19 Dengan Kepatuhan Penerapan Protokol Kesehatan Pada Saat Pandemi Covid-19 Masyarakat Desa Sumberagung Banyuwangi

xv+80 halaman+1 bagan+8 tabel+13 lampiran

Abstrak

Pengetahuan tentang penyakit Covid-19 merupakan hal yang sangat penting agar mampu mencegah peningkatan jumlah kasus penyakit Covid-19. Protokol kesehatan merupakan aturan dan ketentuan yang perlu diikuti oleh segala pihak agar dapat beraktivitas secara aman pada saat pandemi Covid-19 ini. Tujuan penelitian ini untuk mengetahui hubungan tingkat pengetahuan Covid-19 dengan kepatuhan penerapan protokol kesehatan pada saat pandemi Covid-19 masyarakat Desa Sumberagung Banyuwangi. **Metode:** Desain penelitian ini kuantitatif dengan jenis penelitian *correlation research* dengan pendekatan *study cross sectional*. Sampel pada penelitian ini berjumlah 132 responden masyarakat Dusun Sungailembu Desa Sumberagung Banyuwangi. Alat ukur yang digunakan yaitu kuisioner. Analisis dalam penelitian ini menggunakan uji *Spearman rho*. **Hasil:** Hasil penelitian tingkat pengetahuan covid-19 menunjukkan hasil cukup 72.0% dan kepatuhan penerapan protokol kesehatan menunjukkan hasil cukup 57.6%, serta diketahui ada hubungan tingkat pengetahuan covid-19 dengan kepatuhan penerapan protokol kesehatan pada masyarakat dengan nilai *koefisien (r)* 0,522 dengan *p-value* <,001 yang artinya memiliki hubungan kuat dengan dua variabel. **Diskusi:** Dari hasil yang sudah ada maka dapat disimpulkan bahwa seseorang yang mempunyai pengetahuan baik maka seseorang juga akan lebih patuh dalam menerapkan protokol kesehatan. **Saran:** Diharapkan masyarakat dapat lebih patuh dalam menerapkan protokol kesehatan guna meminimalisir penyebaran Covid-19.

The Relationship Between The Level Of Knowledge Of Covid-19 And Compliance With The Application Of Health Protocols During The Covid-19 Pandemic The Village Community Of Sumberagung Banyuwangi

xv+80 pages+1 chart+8 tables+13 appendix

Abstract

*Knowledge about COVID-19 disease is very important so as not to cause an increase in the number of COVID-19 cases. Health protocols are rules and regulations that need to be followed by all parties in order to carry out their activities safely during the COVID-19 pandemic. The purpose of this study was to determine the relationship between the level of knowledge of COVID-19 and compliance with the application of health protocols during the COVID-19 pandemic for the people of Sumberagung Village, Banyuwangi. **Method:** This is a quantitative research design based on correlation research using a cross-sectional study approach. The sample in this study amounted to 132 respondents from the Sungailembu Village Sumberagung Village community, Banyuwangi. The measuring instrument used is a questionnaire. Analysis in this study using the test Spearman rho. **Results:** The results of the study on the level of knowledge of COVID-19 showed sufficient results of 72.0% and compliance with the application of health protocols showed sufficient results of 57.6%, and it is known that there is a relationship between the level of knowledge of COVID-19 and compliance with the application of health protocols in the community with a coefficient value (r) of 0.522 and a p-value of .001, which means it has a strong relationship with two variables. **Discussion:** from the existing results, it can be concluded that someone who has good knowledge will also be more obedient in implementing health protocols. **Suggestion:** it is hoped that the community will be more obedient in implementing health protocols to minimize the spread of Covid-19.*
