Dear Rohmah, Nikmatur; Masruroh, Masruroh; Marasabessy, Nur Baharia; Pakaya, Nasrun; Prasetyo, Joko; Walid, Saiful; Laksono, Agung Dwi:

A manuscript entitled "Factors related to low birth weight in Indonesia" has been successfully submitted online by Mr. Laksono and is presently being given full consideration for publication in the Malaysian Journal of Nutrition.

The manuscript ID is mjn.2021.0123.

Please mention the above manuscript ID in all future correspondence. If there are any changes in your personal particulars or e-mail address, please log in to ScholarOne Manuscripts at <https://mc04.manuscriptcentral.com/nutriweb> and edit your user information as appropriate.

You can also view the status of your manuscript at any time by checking your Author Center after logging in to <https://mc04.manuscriptcentral.com/nutriweb>.

If you have any objection on your name being included in this submission, please e-mail to: [mjnadmin@nutriweb.org.my](mailto:mjnadmin@nutriweb.org.my).

Thank you for submitting your manuscript to the Malaysian Journal of Nutrition, an official publication of the Nutrition Society of Malaysia (<http://www.nutriweb.org.my>).

Sincerely,  
Malaysian Journal of Nutrition Editorial Office

Dear Dr. Laksono,

Thank you for your email. You may have misunderstood my first email. What you have submitted are the old main document include the Point-by-Point Response to the Reviewers' comments. You are required to **address the following comments made by the Editors using the attached formatted word file. Please submit FINAL CLEAN revised manuscript using the attached formatted word file. FINAL CLEAN means without any tracked changes. Appreciate it if you could also submit Point-by-Point Response to the following comments too. Please read my first email carefully.**

1) Results, Paragraph 1, Table 1 - Please re-calculate the percentages for "Yes" vs "No" columns for EACH group, i.e. Yes% + No% = 100% . See example that I have done for you for the Age groups. When done this way, you can interpret it as below: The teenage group (15-19 years) has the highest proportion of babies born with low birth weight. Then, your results will tally with the OR results in the Table 2.

2) Results, Paragraph 2 - Please re-interpret all the results written in this & the next paragraph based on the new calculations.

3) Results, Paragraph 2 - The use of 'more likely' and 'less likely' was removed in this paragraph to better differentiate between prevalence vs. probability.

- 4) Results, Paragraph 3, Line 2, 'reference in this research was the non-occurrence of LBW.' - You might need to re-analyse the ORs if you want to keep to this principle. Or, you can keep the OR analysis as is, and OMIT this sentence.
- 5) Discussion section - Please double check that all Discussion matches with the new tabulation of percentages in Table 1.

Dear Dr. Laksono,

Greetings from Malaysian Journal of Nutrition Editorial Office. Thank you for your patience.

With reference to your accepted manuscript titled **"Factors related to low birth weight in Indonesia"**, we are pleased to inform you that we have completed language editing of the manuscript and formatted the document accordingly.

Kindly refer to the edited manuscript and comments made by the Editors for your attention:

1) Results, Paragraph 1, Table 1 - Please re-calculate the percentages for "Yes" vs "No" columns for EACH group, i.e. Yes% + No% = 100% . See example that I have done for you for the Age groups. When done this way, you can interpret it as below: The teenage group (15-19 years) has the highest proportion of babies born with low birth weight. Then, your results will tally with the OR results in the Table 2.

2) Results, Paragraph 2 - Please re-interpret all the results written in this & the next paragraph based on the new calculations.

3) Results, Paragraph 2 - The use of 'more likely' and 'less likely' was removed in this paragraph to better differentiate between prevalence vs. probability.

4) Results, Paragraph 3, Line 2, 'reference in this research was the non-occurrence of LBW.' - You might need to re-analyse the ORs if you want to keep to this principle. Or, you can keep the OR analysis as is, and OMIT this sentence.

5) Discussion section - Please double check that all Discussion matches with the new tabulation of percentages in Table 1.

6) Reference, Achadi EL (2019). Maternal and neonatal death in Indonesia (*Kematian maternal dan neonatal di Indonesia*). *Rakerkernas* 2019(1):1-47. [http://www.depkes.go.id/resources/download/info-terkini/rakerkesnas-2019/SESI I/Kelompok 1/1-Kematian-Maternal-dan-Neonatal-di-Indonesia.pdf](http://www.depkes.go.id/resources/download/info-terkini/rakerkesnas-2019/SESI%20I/Kelompok%201/1-Kematian-Maternal-dan-Neonatal-di-Indonesia.pdf) - please check link, site cannot be reached.

7) Reference, Laksono AD, Wulandari RD, Ibad M, Herwanto YT, Sarweni KP, Geno RAP & Nugraheni E (2020b). Predictors of healthy lifestyle in the COVID-19 pandemic period in East Java, Indonesia. *J Crit Rev* 7(18):1515–1521. <https://doi.org/10.31838/jcr.07.18.195> -DOI not found, please check.

8) Reference, Stevens LM, Lynn C & Glass RM (2015). Low birth weight. *J Am Med Assoc* 287(2):270. <https://doi.org/10.1001/jama.287.2.270> - page not found, please check this.

9) Reference, WHO (2017). *Optimal Feeding of Low-Birthweight Infants in Low- and Middle-Income Countries Highlights from the World Health Organization 2011 Guidelines* (Vol. 10, Issue June). <https://doi.org/10.1186/1742-4755-10-S1-S2.2> - DOI not found, please check if this reference should be: WHO (2011). Guidelines on optimal feeding of low birth-weight infants in low- and middle-income countries. World Health Organization. From: [https://apps.who.int/iris/bitstream/handle/10665/85670/9789241548366\\_eng.pdf?sequence=1&isAllowed=y](https://apps.who.int/iris/bitstream/handle/10665/85670/9789241548366_eng.pdf?sequence=1&isAllowed=y)

10) Table 1 - Please re-calculate the percentages for all characteristics. Make sure % No and % Yes adds up to 100%

11) Table 1, ANC - Added 'visits'

12) Table 2, Wealth - Added 'status'

13) Table 2, ANC - Added 'visits' and 'times'

Please be informed that some of the sentences have been edited so do read the manuscript thoroughly. It is important that you check it against your original just in case the meaning you intend has been inadvertently changed. Kindly note that it is NOT permitted to change the title or authorship unless in exceptional circumstance, which would require a new copyright agreement and a written authorisation by any or all authors, affected. Once we received the final checked and revised clean manuscript, we will proceed to layout, you will then be given the final PDF for checking. Your manuscript will be published as Online First once you have approved the final PDF.

Kindly respond by clicking **REPLY ALL** with the **FINAL CLEAN** revised manuscript latest by **Thursday, 21 July 2022**. Please submit Point-to-Point

response to Editors' comments. You may use the attached sample.

Thank you for your kind cooperation in the editorial process.

Sincerely,

Dr Roseline Yap

Dear Dr. Laksono,

Terima kasih atas email Anda. Anda mungkin salah memahami email pertama saya. Apa yang Anda kirimkan adalah dokumen utama lama termasuk Tanggapan Poin demi Poin terhadap komentar Peninjau. Anda diminta untuk **menanggapi komentar berikut yang dibuat oleh Editor menggunakan file kata berformat terlampir. Silakan kirimkan naskah revisi FINAL CLEAN menggunakan file kata berformat terlampir. FINAL CLEAN berarti tanpa perubahan telacak. Terima kasih jika Anda juga dapat mengirimkan Tanggapan Poin demi Poin ke komentar berikut juga. Harap baca email pertama saya dengan seksama.**

1) Hasil, Paragraf 1, Tabel 1 - Harap hitung kembali persentase kolom "Ya" vs "Tidak" untuk SETIAP kelompok, yaitu  $Ya\% + Tidak\% = 100\%$  . Lihat contoh yang telah saya lakukan untuk Anda untuk kelompok Usia. Jika dilakukan dengan cara ini, Anda dapat memaknainya sebagai berikut: Kelompok remaja (15-19 tahun) memiliki proporsi bayi yang lahir dengan berat badan lahir rendah paling tinggi. Kemudian, hasil Anda akan sesuai dengan hasil OR pada Tabel 2.

2) Hasil, Paragraf 2 - Harap tafsirkan ulang semua hasil yang tertulis di paragraf ini & berikutnya berdasarkan perhitungan baru.

3) Hasil, Paragraf 2 - Penggunaan 'lebih mungkin' dan 'kurang mungkin' dihilangkan dalam paragraf ini untuk membedakan dengan lebih baik antara prevalensi vs. probabilitas.

4) Hasil, Paragraf 3, Baris 2, 'rujukan dalam penelitian ini adalah tidak terjadinya BBLR.' - Anda mungkin perlu menganalisis ulang OR jika Anda ingin mempertahankan prinsip ini. Atau, Anda dapat menyimpan analisis OR apa adanya, dan MENGHAPUS kalimat ini.

5) Bagian Diskusi - Harap periksa kembali apakah semua Diskusi cocok dengan tabulasi persentase baru pada Tabel 1.

agung dwi wrote on 15.07.2022 04:24 (GMT +08:00):

Dear Dr Roseline Yap

Thank you for your email.

It was attached with this email an updated manuscript that was revised as suggested.

Warm regard

titled **Factors related to low birth weight in Indonesia**

we are pleased to inform you that we have completed language editing of the manuscript and formatted the document accordingly.

Kindly refer to the edited manuscript and comments made by the Editors for your attention:

1) Results, Paragraph 1, Table 1 - Please re-calculate the percentages for "Yes" vs "No" columns for EACH group, i.e. Yes% & No% & 100% . See example that I have done for you for the Age groups. When done this way, you can interpret it as below: The teenage group (15-19 years) has the highest proportion of babies born with low birth weight. Then, your results will tally with the OR results in the Table 2.

2) Results, Paragraph 2 - Please re-interpret all the results written in this & the next paragraph based on the new calculations.

3) Results, Paragraph 2 - The use of 'more likely' and 'less likely' was removed in this paragraph to better differentiate between prevalence vs. probability.

4) Results, Paragraph 3, Line 2, &reference in this research was the non-occurrence of LBW.& - You might need to re-analyse the ORs if you want to keep to this principle. Or, you can keep the OR analysis as is, and OMIT this sentence.

5) Discussion section - Please double check that all Discussion matches with the new tabulation of percentages in Table 1.

6) Reference, Achadi EL (2019). Maternal and neonatal death in Indonesia (*Kematian maternal dan neonatal di Indonesia*). *Rakerkernas* 2019(1):1-47. <http://www.depkes.go.id/resources/download/info-terkini/rakerkesnas-2019/SESI> I/Kelompok 1/1-Kematian-Maternal-dan-Neonatal-di-Indonesia.pdf - please check link, site cannot be reached.

Dear Dr Roseline Yap

Thank you for your e-mail.

All the changes you suggest are correct.

This situation is due to a 100% change in direction from column to raw.

I confirmed the change.

Regards,

Dr. Agung Dwi Laksono
