SCOPE

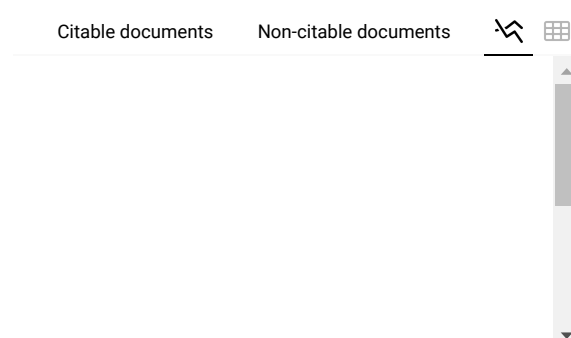

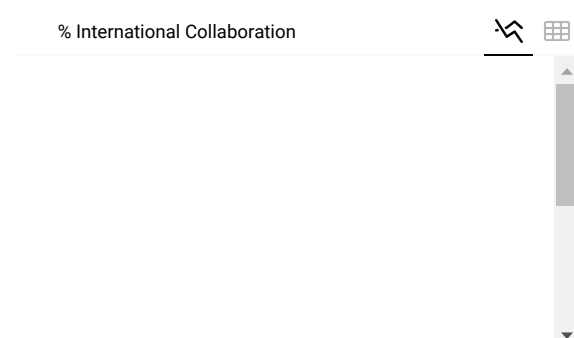

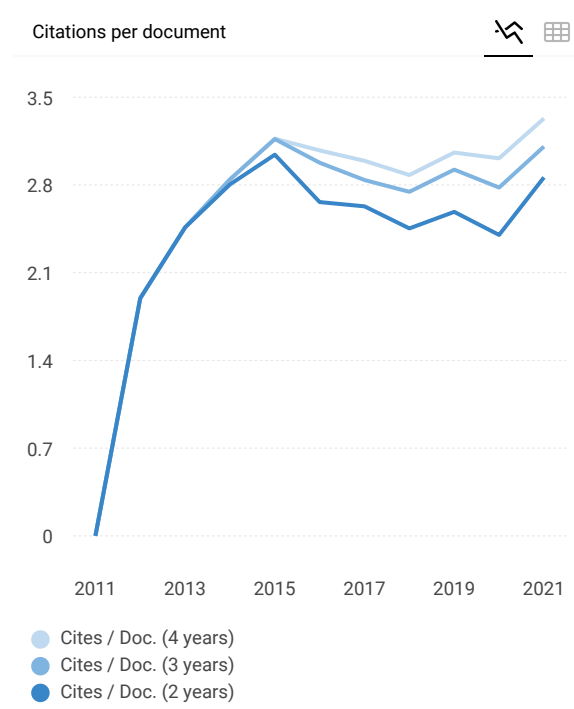

BMJ Open is a medical journal. We consider papers addressing research questions in clinical medicine, public health and epidemiology. We also welcome studies in health services research, health economics, surgery, qualitative research, research methods, medical education, medical publishing and any other field that directly addresses patient outcomes or the practice and delivery of healthcare. Our focus is on research that is relevant to patients and clinicians. We do not publish studies conducted in animals, laboratory studies not linked to patient outcomes, papers reporting solely physiological or biomechanical results from healthy participants, anatomy, cell biology or non-clinical psychology. All research study types are considered, from study protocols through phase I trials to meta-analyses. This includes specialist studies and studies reporting negative results.

Estimado Doctor Ríos:
Gracias por escribirnos.

Lamentamos informarle que SCImago Journal & Country Rank no es una revista. SJR es un portal con indicadores cuantitativos de revistas indexadas en Elsevier / Scopus razón por la cual, desafortunadamente, no podemos ayudarle con su solicitud.

Le sugerimos visitar el sitio web de la revista (específicamente información para autores) o que comunicarse con el personal editorial de la revista, para que puedan informarle correctamente.

Saludos cordiales,
Equipo SCImago
