GREETING MESSAGE

Assalamu'alaikum Wr.Wb.

Thanks Allah for all the blessings He has bestowed on us.

First of all, I would like to welcome you all at 2nd the International Nursing Conference 2015. I'm so pleased to see many colleagues, friends, and families from Indonesia; and speakers from University of Jember Indonesia, University of Philippines Manila, Burapha University Thailand, Kanazawa University Japan, National Cheng Kung Taiwan, and Representative from World Health Organization, all in one place, at Jember East Java Indonesia.

Health is expensive due to health care costs remain high. As developing country, the most of people skip out on medical or nursing care over cost concerns. Number of health professionals and health care facilities are not comparable with the needs of society. So we must innovate for strategic planning to overcome this issue. Community empowerment approach is the best way for attaining healthy communities. This the prime reason why this conference take the theme **"Nursing Role to Sustainable Development Goals Achievement Based On Community Empowerment"**. We hope, who participate in this conference will facilitate our community to achieve their health by themselves.

Once again I would like to thank you all for coming. Please, enjoy your participation at this International Conference which held and memorable time visiting the Jember District, East Java, Indonesia. We hope you return next year with even more colleagues for 3rd International Conference.

Thank You. Have a wonderful conference.

Wassalamualaikum. Wr. Wb

Chairperson

Ns. Emi Wuri Wuryaningsih, M.Kep., Sp.Kep.J
