SCOPE

The SEAMEO* Regional Tropical Medicine and Public Health Project was established in 1967 to help improve the health and standard of living of the peoples of Southeast Asia by pooling manpower resources of the participating SEAMEO member countries in a cooperative endeavor to develop and upgrade the research and training capabilities of the existing facilities in these countries. By promoting effective regional cooperation among the participating national centers, it is hoped to minimize waste in duplication of programs and activities. In 1992 the Project was renamed the SEAMEO Regional Tropical Medicine and Public Health Network.

H   **hyuny**   2 years ago

Its a bad experience in submitting my paper in this journal. The process is very late and took long
delay. The most inconvenience think, my paper was not published in official website that why it
couldn't indexed by scopus.

reply

D   **dmar**   2 years ago

Then you don't understand how SCOPUS works. Don't blame the journal. Just because your
paper was published doesn't mean it will be indexed automatically. SCOPUS will only index
articles that are good enough to be indexed and they will index at their own pace.
