Dear Author(s),

We have received the review reports for your paper "Enhancing The Performance of Sentiment Analysis Task on Product Review by Handling Both Local and Global Context."

We require now that you implement in your submission the following recommendations made by the reviewers:

Reviewer A Comments:

=====

Suggestions which would improve the quality of the paper but are not essential for publication:

1. The mathematical expressions are not precise. For example, in Equation (2), index  $j$  is not defined. Also  $ws_{ja} \in w_i$  is very confusing.
2. Since there are so many notations with indices, one would suggest that the author(s) provide a list of notations with definitions, in which the symbols for indices are distinct.
3. Acronyms need to be defined before being referred. For example, WSD is not defined, although one knows it stands for the Word Sense Disambiguation method.
4. One can easily point out the grammatical errors, such as "similarity like is presented in equation 7" in the paragraph before Equation 7, "Different with was done by..." in the following page.

Changes which must be made before publication:

1. The bad writing makes this paper awful to read, and the authors fail to convey the ideas of their study.
2. Each step in the proposed method needs more details of how it is done. For example, in the step of edge extraction, the similarity measure is crucial. One would like to see how it is calculated, and why the specific algorithm is chosen.
3. The authors need to explain the reason why the whole model is built, other than just picking up some techniques and methods.
4. The paper needs to provide its experimental design. Just looking at the results, one would have hard time to see how they are obtained. Is it a one time experiment for a data set? If so, the results are far from convincing. The author(s) need to provide more experiments on different data sets.

Reviewer B Comments:

=====

Suggestions which would improve the quality of the paper but are not essential for publication:

The manuscript "Enhancing The Performance of Sentiment Analysis Task on Product Review by Handling Both Local and Global Context" addresses an age-old topic. Most of recent published papers related to Sentiment Analysis actually discussed about what you called "global context" while what you called "local context" could be similar to their basic steps. Literature review was insufficient.

NOTE: Please send an email to the editor to acknowledge the reception of this email notification. The editor needs to make sure that messages reach the authors and don't delay the review process.

-----

Instructions

- 1) To help the reviewer(s) verify that you have made the required corrections, please append a point-by-point report detailing how the changes have been made in line with each reviewer's comments at the beginning of your revised manuscript.
- 2) Responses to reviewers' comments and the revised manuscript must go together in the same single MS Word or PDF file, without revealing authors' identifications.
- 3) AUTHORS MUST INCLUDE IN THEIR REVISED MANUSCRIPT ALL THE REVISIONS, EDITING AND CORRECTIONS REQUIRED BY ALL REFEREES, OTHERWISE THEIR SUBMISSIONS WOULD NOT BE FURTHER PROCESSED AND WOULD BE REJECTED.
- 4) Append figures, images and tables at the end of your revised manuscript.
- 5) To upload your revised manuscript, please:  
Login via <http://www.inderscience.com/ospeers/login.php>  
(if you do not remember your username or password, you can recover it via <http://www.inderscience.com/forgotpw.php>)  
Then point your browser to <http://www.inderscience.com/ospeers/admin/author/articlestatus.php?id=194171> and scroll-down to find the input box "Author's revised version of file".  
Click on 'Browse...' to select the revised document to be submitted and click 'Upload'.

6) Click on "Editor/Author Comments" to access the referee(s) comments and possible annotated files.

7) We advise you to use MS Word to edit your submission and make sure that the revisions within the document are presented as "tracked changes" so they would be more easily seen by the editor and the reviewers. It is preferable that you upload your revised manuscript using a MS Word file. If you use LaTeX, please mark your changes as text in colour and provide a PDF file of your article and the response to the reviewers.

To remove the personal information about tracked changes in MS Word:

In Word 2007: Round Office button -> Prepare -> Inspect Document -> Inspect -> Document Properties and Personal Information -> Remove All -> Close

In Word 2010 and later: File > Check for Issues -> Inspect Document -> Inspect -> Document Properties and Personal Information -> Remove All -> Close

If you have problems uploading the file with your revised manuscript please contact [submissions@inderscience.com](mailto:submissions@inderscience.com) indicating the submission ID of your article.

-----

NOTES:

- In general we expect to receive your revised manuscript within three months or by the revision deadline established by the editor. Please contact the editor if you will take more than three months to resubmit your revised manuscript.

- It is the publisher's policy to give authors the opportunity to revise and improve their submitted papers to be accepted for publication, as requested by the referees. Please note that all the revisions, editing and English correction requested have to be made and accepted by the referees otherwise the paper will be rejected at any stage of the refereeing process.

Your prompt attention is much appreciated.

### PROOF OF PAPER FOR CHECKING

**Title: Enhancing the performance of sentiment analysis task on product reviews by handling both local and global context**

Dear Author,

The amendments you requested to your paper have been incorporated and I attach a copy for you to confirm the changes have been made correctly as it may not be possible to make any further amendments at this stage before publication.

To avoid delay to publication it is important that you email confirmation of your acceptance of the proof as soon as possible and certainly within the next seven days. If we do not hear from you again within this time we will process the corrected paper for publication.

You will receive a pdf via email with full citation and page numbers when the issue is sent to press.

The paper can be seen listed as forthcoming at: <http://www.inderscience.com/info/ingeneral/forthcoming.php?jcode=ijids>

The DOI is assigned when the paper appears online.

Many thanks

#### **PROOFS OF PAPER FOR CHECKING**

**Title: Enhancing the performance of sentiment analysis task on product reviews by handling both local and global context**

Dear Author

I attach the proofs of your paper for inclusion in the International Journal of Information and Decision Sciences to be published by Inderscience Publishers.

**Please check the paper and confirm acceptance or let me have any amendments/changes within 2 weeks of the date of this email.**

If a previous version of your paper has originally been presented at a conference, please include a statement to this effect as follows or complete if already shown on your proof:

***This paper is a revised and expanded version of a paper entitled [title] presented at [name, location and date of conference].***

**Please ensure that you send ALL amendments with your reply as it is unlikely that any further changes will be possible. You will be sent a final revised version to approve after your amendments have been incorporated.**

**Detailed requirements for the Abstract and Keywords** can be found on the Inderscience website [www.inderscience.com](http://www.inderscience.com) under Notes for Authors

- **Abstract:** approximately 100 words, maximum 150.
- **Keywords:** approximately 10-15 words or phrases.  
**Keywords are important for online searching.** The Importance of Keywords. Metadata (title/author details/abstract/keywords) is a vital part of any paper, since, in our online world, it is the metadata which is freely available to all users and is sent to many and varied online sources, from which users undertaking online searches will trace the paper. If you want your paper retrieved by the maximum number of people, the metadata is vital. The **Keywords** field is essential in that this is the most frequently searched field if search results.
- Biographical notes: approximately 100 words per author, maximum 150.

With regards to keywords, please check that ALL the essential words/terms from the title and abstract are included; if more than 1 word, the words should be a phrase, not a description. Therefore, please check papers for:

- a. do the words/phrases in the title appear in the keywords – NO – then please add
- b. are there enough keywords in the field? (i.e., if there are only 2–3 keywords, then probably not – please expand)
- c. are there long phrases with 'of' and 'and' in them? (YES – then please re-format into key phrases).

Where applicable, the title of the journal should also appear in the keywords (e.g., for International Journal of Nanotechnology, 'nanotechnology' should appear in the keywords; for International Journal of Environment and Pollution, 'environmental pollution' would be the phrase to use. This is obviously more applicable to some journals rather than others.

**To ensure the publication schedule is maintained and in the event of you not replying within this timescale, contact will be made with the Editor of the issue and it is possible that the paper will be held back from publication.**

**It is the policy of Inderscience Publishers not to publish any papers unless final approval of the edited copy has been obtained from the author.**

May we ask you to indicate your amendments using one of the following:

- list the corrections/amendments in an MS Word file (see attached)
- list in an email and indicate the page number, paragraph number and/or line number one by one; copy a portion of the text that needs correcting so we can locate them making the implementation of corrections more accurate
- make annotations/sticky notes on the PDF.

**If any figures appear in colour, please note that they will only appear in colour in the online version, but in the printed version, they will be in black and white.**

**If the quality of the colour figure supplied is not suitable to be produced in colour, it will only be shown in black and white in the online version. However, if colour is essential to the figure, please send a better quality colour image with your proof reply.**

Where there is more than one author, please indicate who is the corresponding author if not already shown and kindly respond to any queries in the paper.

**Please note there is a very long waiting list for publication in this journal between 2–3 years.**

Many thanks

Kind regards

Dear editor,

I have checked the last version of your proof and I accept all the proof of the amendments. Only, in the last sentence of abstract, i.e 'Overall, the proposed method outperformed the baseline method in the metrics of precision,recall, F-measure and accuracy).', brackets seems not needed. Thank you for your kind help.
