Hubungan Masa Bekerja Tim *Code Blue* dengan *Self Efficacy* Dalam Penatalaksanaan Pasien Gawat Darurat di Rumah Sakit Bina Sehat Jember.

Xviii + 89 hal + 19 tabel + 1 skema + 16 lampiran

Abstrak

Pendahuluan: Masa bekerja sebagai tim *code blue* merupakan pengalaman yang dijalani selama menjadi tim *code blue* di Rumah Sakit Bina Sehat Jember. Semakin lama masa bekerja tenaga kesehatan maka pengalaman dalam menguasai bidangnya semakin dalam, sehingga mampu memiliki *self efficacy* yang tinggi dan mampu melakukan sesuatu sesuai tindakan dengan rasa kepercayaan diri yang tinggi. Tujuan penelitian: ini untuk mengetahui hubungan masa bekerja tim *code blue* dengan *self efficacy* dalam penatalaksanaan pasien gawat darurat. Metode: penelitian ini menggunakan desain penelitian *descriptive correlational* dengan pendekatan *Cross Sectional*. Populasi dalam penelitian ini adalah tenaga kesehatan tim *code blue* di Rumah Sakit Bina Sehat Jember. Teknik pengambilan sampel menggunakan total sampling dengan jumlah sampel 52 tenaga kesehatan. Alat pengumpulan data yang digunakan ialah kuesioner yang berisi 1 pertanyaan pada variabel masa bekerja tim *code blue* dan kuesioner *self efficacy* yang berjumlah 10 pertanyaan yang sudah peneliti uji validitas dan realibitasnya. Analisis data yang digunakan yaitu uji Korelasi *Spearman rho* untuk mengetahui adanya hubungan masa bekerja tim *code blue* dengan *self efficacy*. Hasil: penelitian menunjukkan nilai  $p < 0,001 < 0,05$  yang artinya  $H_0$  di tolak sehingga terdapat hubungan masa bekerja tim *code blue* dengan *self efficacy* dalam penatalaksanaan pasien gawat darurat. Kesimpulan penelitian ini yaitu lama masa bekerja sebagai tim *code blue* berkorelasi positif dengan *self efficacy* yang dimiliki tenaga kesehatan Rumah Sakit Bina Sehat Jember.

Kata Kunci: Masa Bekerja; Tim *Code Blue*; *Self Efficacy*.

*The Relationship between Working Period of the Code Blue Team and Self Efficacy in the Management of Emergency Patients at Bina Sehat Hospital Jember.*

*Xviii + 89 pages + 19 tables + 1 scheme + 16 attachments*

*Abstract*

*Introduction: The period of working as a code blue team is an experience lived as a code blue team at Bina Sehat Jember Hospital. The longer the work period of health workers, the deeper the experience in mastering their field, so that they are able to have high self-efficacy and are able to do things according to actions with high self-confidence. Research objective: this is to determine the relationship between working period in the code blue team and self-efficacy in the management of emergency patients. Method: this study uses a descriptive correlational research design with a cross sectional approach. The population in this study were health workers from the code blue team at Bina Sehat Jember Hospital. The sampling technique used total sampling with a total sample of 52 health workers. The data collection tool used was a questionnaire containing 1 question on the variable code blue team work period and a self-efficacy questionnaire consisting of 10 questions that the researcher had tested for validity and reliability. The data analysis used was the Spearman rho Correlation test to determine whether there was a relationship between code blue team work experience and self-efficacy. Results: the study showed a p-value of  $0.001 < 0.05$ , which means that  $H_0$  was rejected, so there is a relationship between working period in the code blue team and self-efficacy in the management of emergency patients. The conclusion of this study is that the length of time working as a code blue team is positively correlated with the self-efficacy of health workers at Bina Sehat Jember Hospital.*
