PREFACE

In the name of Allah, the most merciful is the most merciful. Praise be to Allah, the God of the universe who has given me the opportunity and strength to finish this thesis.

My thesis focuses on the correlation between speaking anxiety and perceived pronunciation accuracy. This thesis is written with the hope that it will be useful for Indonesian EFL students to find out whether there is a correlation between speaking anxiety and pronunciation accuracy or not. In addition, hopefully the results of this research can anticipate readers' pronunciation barriers, motivating them to improve their pronunciation.
