Abstract

Talking about responsibility in protecting the environment is a joint task between the community and the Government. However, the environmental pollution problems that occur in the Situbondo area, especially in Pasir Putih Beach, Situbondo Regency, are very dilemma, because the pollution that occurs is caused by people who do not think about the impacts that will occur on the environment. So that in this case a policy or responsibility of the Regional Government is needed to anticipate the occurrence of environmental pollution. The method of writing in this study uses the problem approach method, namely the legislative approach and the conceptual approach, the type of research used is descriptive research. Situbondo Regency Government is related to environmental pollution problems that occur in Pasir Putih Beach Situbondo Regency Government has issued Situbondo District Regulation Number 6 of 2014 concerning Environmental Protection and Management as a form of policy towards environmental management in the Situbondo Regency. By looking at the conditions or conditions in the Pasir Putih Beach, Situbondo Regency, a strong action and responsibility of the Situbondo Regency Government is needed through the Environmental Agency of Situbondo Regency to make efforts to overcome or overcome environmental pollution problems that occur in the Pasir Putih Beach of Situbondo Regency. The efforts of the Situbondo Regency Environmental Agency have been quite efficient, such as issuing PERDA and building garbage facilities and infrastructure or landfills, this is one form of responsibility of the Situbondo Regency Government.

Keywords: Responsibility, Local Government, and Environmental Pollution.
