Hubungan Tinggi Badan Ibu Dengan Kejadian Stunting Pada Anak Balita Di  
Desa Paleran

xvii + 80 lembar + Daftar Gambar 3 + 14 Tabel

### **Abstrak**

Tujuan penelitian ini adalah untuk mengetahui hubungan tinggi badan ibu dengan kejadian stunting pada balita di Desa Paleran. Desain penelitian ini adalah korelasi dengan pendekatan crosssectional. Populasi penelitian ini 150 balita dengan sampel 110 balita. Teknik sampling yang digunakan adalah probability sampling dengan pendekatan simple random sampling. Instrumen pada penelitian ini berupa kuesioner dan lembar observasi. Hasil uji statistic Spearman's Rho menunjukan ada hubungan antara tinggi badan ibu dengan kejadian stunting dan balita yang mengalami stunting ( $p=$  ), namun tidak ada hubungan signifikan antara jarak kelahiran dengan kejadian wasting di Desa Paleran. Kesimpulan tidak ada hubungan tinggi badan ibu dengan kejadian stunting pada balita di Desa Paleran.

Kata Kunci: Tinggi Badan Ibu, Stunting

*The Relationship between Maternal Height and the Incident of Stunting in Children Under Five in Paleran Village*

xvii + 80 sheets + List of Figures 3 + 14 Tables

*Abstract*

*The aim of this research was to determine the relationship between maternal height and the incidence of stunting among toddlers in Paleran Village. The design of this research is correlation with a cross-sectional approach. The population of this study was 150 toddlers with a sample of 110 toddlers. The sampling technique used is probability sampling with a simple random sampling approach. The instruments in this research were questionnaires and observation sheets. The results of the Spearman's Rho statistical test show that there is a relationship between maternal height and the incidence of stunting and toddlers who experience stunting ( $p=$  ), but there is no significant relationship between birth distance and the incidence of wasting in Paleran Village. The conclusion is that there is no relationship between maternal height and the incidence of stunting among toddlers in Paleran Village.*
