## **ABSTRACT**

Government institute is an organization ministry or department. An in government institute, surely there are permanent employers, there for appointmen for the permanent employees is needed. To actualize it, we need a selection process, there are 4 criteria, those are discipline, long dedication, atten dance and certificate. The decision will be taken is expected to be accordance with those criteria, so make the head of jember religious court easier. But this research has a subjective element, therefore this research uses decisions support system using AHP method by comparing the importance value of criteria. In this thesis is built an application by using AHP method. This application is used to assist assement of the permanent employees in jember religious counth with those criteria

**Keywords:** criteria from the head of jember religious count, permanent employees, decisions support system, AHP
