ABSTRACT

Today's industrial activities are inseparable sectors in the economic development of a country or even the wheels of the world economy. The industrial sector has made major contributions such as opening up employment opportunities with the discovery of innovations in the field of technology and various other contributions both in the economic, political and social fields. This challenge is found to be especially true in developing countries, due to various development activities aimed at improving the welfare of humanity, which also have an impact on environmental change. This has led to the government's obligation to ensure that the Regional Government runs efficiently and effectively in accordance with the plan of the provisions of Law Number 32 of 2009 concerning Environmental Protection and Management. For this reason, the writer is interested in a study entitled The Government Policy of Jember Regency in Managing Limestone Management Activities.

Keywords: Environment, Local Government, Limestone

Kegiatan industri saat ini menjadi sektor yang tidak dapat dipisahkan dalam pembangunan ekonomi suatu negara atau bahkan roda perekonomian dunia. Sektor

industri telah memberikan kontribusi yang besar seperti pembukaan lapangan kerja dengan ditemukannya inovasi dalam bidang teknologi dan berbagai kontribusi lainnya
