Faktor Yang Mempengaruhi Kepatuhan Penatalaksanaan Post Operasi Katarak Baksos LP2SM Di Kecamatan Wonosari

### Abstrak

Katarak suatu keadaan dimana terjadi kekeruhan pada lensa di dalam kapsul lensa. Ada factor yang mempengaruhi kepatuhan penatalaksanaan post operasi yaitu faktor pengetahuan, sikap, dukungan keluarga dan motivasi. Tujuan penelitian ini adalah untuk mengetahui faktor yang mempengaruhi kepatuhan penatalaksanaan post operasi katarak. Penelitian ini merupakan penelitian kuantitatif. Subjek penelitian adalah pasien operasi katarak tahun 2019 di Kecamatan Wonosari dengan populasi dalam penelitian ini adalah pasien katarak sebanyak 55 orang dan mengambil sampel yaitu 55 pasien di ambil secara *nonprobability sampling* dengan *sampling kuota*. Pengumpulan data menggunakan data sekunder yang ada dilembaga LP2SM Baksos di Kecamatan Wonosari Analisis data menggunakan distribusi frekuensi. Hasil penelitian menunjukkan tingkat pendidikan 65.5% dalam kategori baik, sikap pasien pasca operasi katarak 80.0% baik, motivasi yang dimiliki pasien pasca operasi katarak 54.5% cukup baik, dukungan keluarga 45.5% baik, dan kepatuhan penatalaksanaan post operasi katarak 89.1% baik. Kesimpulan akhir dalam penelitian ini berdasarkan “faktor yang mempengaruhi kepatuhan penatalaksanaan post operasi katarak baksos LP2SM di kecamatan wonosari” adalah tingkat pendidikan pasien baik dengan persentase 65.5%, sikap pasien baik dengan presentase 80.0% dan motivasi pasien cukup baik dengan persentase 54.5% dari beberapa faktor tersebut sangat erat kaitannya dengan kepatuhan penatalaksanaan post operasi katarak baksos LP2SM di kecamatan wonosari

Factors Affecting Compliance Management of Post Cataract Surgery  
for LP2SM Community Service in Wonosari District

### Abstract

Cataract is a condition where there is cloudiness in the lens inside the lens capsule. There are factors that influence postoperative management compliance, namely factors of knowledge, attitudes, family support and motivation. The purpose of this study was to determine the factors that affect adherence to postoperative cataract management. This research is a quantitative research. The research subjects were cataract surgery patients in 2019 in Wonosari District with the population in this study were 55 cataract patients and took samples of 55 patients taken by nonprobability sampling with quota sampling. Data collection used secondary data available in the LP2SM Baksos institution in Wonosari District. Data analysis used frequency distribution. The results showed that the level of education was 65.5% in good category, 80.0% good attitude of post-cataract surgery patients, 54.5% good motivation post-cataract surgery patients, 45.5% good family support, and 89.1% good adherence to cataract surgery administration. The final conclusion in this study is based on "factors that influence compliance with postoperative cataract management of LP2SM in Wonosari sub-district" is the level of patient education is good with a percentage of 65.5%, patient attitude is good with a percentage of 80.0% and patient motivation is good enough with a percentage of 54.5% of several factors. This is closely related to the compliance of postoperative cataract operation management for LP2SM in Wonosari sub-district.

**Keywords:** *Knowledge, attitudes, motivation, family support.*
