ABSTRACT

This study aims to determine the effect of two variables, namely perceptions of benefits and perceived ease of facebook online purchasing decisions. The hypothesis in this study is the perception of benefits and perceived ease of influence on simultaneous or partial online purchasing decisions in Facebook. The object of this research is Facebook online business people in Jember who have a population of 75 respondents using purposive sampling. Data collection techniques used observation, interviews and questionnaires. The analysis used includes the validity test, reliability test, classic assumption test (normality test, multicollinearity test, heteroscedasticity test), multiple linear regression analysis and hypothesis testing (F test, t test, coefficient of determination). The results showed that perceptions of benefits and perceptions of ease simultaneously influencing facebook online purchasing decisions and perceptions of benefits and perceptions of ease partially had a significant effect on facebook online purchasing decisions.
