Title : Implementasi Program Pengembangan Desa Maju Dan Mandiri (P2DM2) Di Kabupaten Jember

The advanced and independent village development program is a village that has the ability to improve the independence of the community in the countryside, by developing social capabilities, especially on key indicators that include the ability of poor families to obtain livelihoods, fulfill basic needs, manage assets, participate in community activities, as well as ability in facing shocks and pressure. Based on Law No. 6 of 2014 concerning Villages, Permendes Regional Development Disadvantaged and Transmigration about IDM and Decree of Director General of PPMD No. 30 of 2016 concerning Status of Progress and Independence of the Village. The Village and Community Empowerment Service makes a developed and independent village development program and includes it in the Strategic Plan. Advanced and independent village development programs provide direction for future village self-reliance development policies. The research method used is descriptive with a qualitative approach. The sources of this research are village government Jember District Community and Village Empowerment Office, village facilitator and village secretary, especially Puger Kulon Village and Puger Wetan, were the objectives of this study. Data collection techniques used in the form of interviews, observation and documentation. Data analysis is done by collecting data, presenting data and conclusions. The results of this study are developed and independent village development programs using the George C. Edward III implementation model. Where this model can be used in implementing government policies or programs.
