

CHAPTER VI

CONCLUSION AND SUGGESTION

On the basis of the research findings and the discussion presented in chapter IV and chapter V, the conclusion and suggestion related to the research result will be presented in the following part.

6.1 Conclusion

From the discussion above it can be concluded that teaching vocabulary by using picture file with STAR strategy can enhance students' vocabulary mastery by real object and provide illustration. It makes students more active, more enthusiastic, and easier to understand the meaning of words. The result of this action research in two cycles had also verified the action hypothesis that use of picture files with STAR strategy can enhance vocabulary mastery of the seventh grade students at MTS Wahid Hasyim Kunir in the 2018/2019 academic year.

6.2 Suggestion

The result of the researcher shows that picture files with STAR strategy can enhance the students' vocabulary mastery. Considering the result, some suggestions are given to the English teacher and the other researcher.

6.2.1 The English Teacher

The English teacher is suggested to use picture files and STAR strategy in teaching vocabulary to enhance the students' vocabulary mastery since it is interesting and motivating students to learn English.

6.2.2 The Other Researcher

The future researchers who have the similar problems are suggested to use the results of this research as references to conduct a further research dealing with use of picture files and STAR strategy by using the same or different research design like experimental or descriptive research, with different language skill for different level of subject and area. Also, the researcher suggested to ask the topic before learning process in learning based on students interest, because when the students decide their own topic, the students will feel happy, enthusiastic, and interest with there the topic.
