Hubungan Harga Diri Orang Tua Dengan Motivasi Dalam Merawat Anak Retardasi Mental Di  
SLB ABC TPA Balung, 2016

xii + 77hal + 1 bagan + 12 tabel + 9 lampiran

### Abstrak

Harga diri (*Self Esteem*) merupakan proses berfikir, emosi, keinginan, tujuan dan kecenderungan seseorang yang merasa mampu di dalam mengatasi masalah dan merasa berharga. Tujuan dari penelitian ini untuk mengetahui hubungan harga diri orangtua dengan motivasi dalam merawat anak retardasi mental di SLB ABC TPA Balung. Desain penelitian yang digunakan yaitu *cross-sectional* dengan jumlah populasi 50 orang tua di SLB ABC TPA Balung, sampel yang diambil 50 responden yang diperoleh dengan tehnik *non probability* sampling dengan total sampling. Pengumpulan data menggunakan kuisioner. Analisis penelitian menggunakan uji *Spearman rho*. Hasil analisis data menunjukkan bahwa orang tua memiliki harga diri tinggi sejumlah 26 (52,0%), harga diri rendah sejumlah 24 (48,0%), dan orang tua memiliki motivasi baik sejumlah 26 responden (52,0%), motivasi cukup sejumlah 12 (24,0%), dan motivasi kurang sebanyak 12 (24,0%). Ada hubungan yang signifikan dengan kekuatan sangat kuat antara harga diri orang tua dengan motivasi dalam merawat anak retardasi mental ( $p;0,000$   $r; 0,916$ ). Semakin tinggi harga diri orang tua maka semakin tinggi pula motivasi orangtua dalam merawat anak retardasi mental. Melalui penelitian ini direkomendasikan kepada sekolah dan orang tua untuk memberikan support, pengetahuan melalui pembelajaran tentang retardasi mental agar dapat merawat anak retardasi mental dengan baik.

*The Correlation Self-Esteem Parents Motivation In Caring for Children With Mental Retardation In SLB ABC TPA Balung, 2016*

*xii+ 77 pages + 1 chart + 12 table + 9 appendixes*

*Abstract*

*Self Esteem is the process of thinking, emotions, desires, goals and the tendency of a person who feels capable in overcoming a problem and feel valuable. The purpose of this study to determine the relationship of self-esteem with the motivation of parents in caring for mentally retarded children in SLB ABC TPA Balung. Research design used is cross-sectional with a population 50 parents in SLB ABC TPA Balung, samples taken 50 respondents were obtained by non-probability sampling technique with a total sampling. Data collection using the questionnaire. Research analysis using Spearman rho test. The results of data analysis showed that older people have high self esteem number of 26 ( 52.0 % ), low self esteem number of 24 ( 48.0 % ), and parents have a good motivation number of 26 respondents ( 52.0 % ), motivation quite a number of 12 ( 24.0 % ), and lack motivation as many as 12 ( 24 % ). There was a significant relationship with the power of self-esteem is very strong between parent and motivation in caring for mentally retarded children (  $p < 0.000$  ;  $r = 0.916$  ). The higher the self-esteem of parents, the higher the motivation of parents in caring for mentally retarded children. Through this research was recommended to the school and parents to provide support, knowledge through learning about mental retardation in order to care for mentally retarded children well.*
