Hubungan Pengetahuan Anggota Pemadam Kebakaran Tentang Resusitasi Jantung Paru dengan Keterampilan Menolong Korban Henti Jantung Di Kabupaten Jember

Xiv + 74 hal + 1 bagan + 9 tabel + 14 lampiran

Abstrak

Gawat darurat merupakan kejadian tiba-tiba yang terjadi dimana saja dan kapan saja serta membutuhkan pertolongan segera. Petugas pemadam kebakaran merupakan petugas yang berperan memberikan pertolongan pertama pada korban kebakaran dan kecelakaan salah satunya korban henti jantung yang membutuhkan penanganan segera dengan memberikan tindakan Resusitasi Jantung Paru. Penelitian ini bertujuan untuk mencari hubungan pengetahuan anggota pemadam kebakaran tentang resusitasi jantung paru dengan keterampilan menolong korban henti jantung dengan desain korelasional pendekatan *Cross Sectional*. Populasi penelitian ini adalah anggota pemadam kebakaran di Kabupaten Jember sebanyak 52 orang dengan sampel 46 responden. Teknik pengambilan sampel menggunakan *cluster sampling* dan menentukan sampel menggunakan *simple random sampling*. Hasil penelitian menunjukkan jumlah terbesar responden memiliki pengetahuan yang baik sebanyak 27 orang (58,7%) dan jumlah terbesar responden terampil dalam menolong korban henti jantung sebanyak 22 orang (47,8%). Uji statistik menggunakan uji *spearman rho* dengan nilai *p value* 0,000 dan diperoleh nilai $r = 0,683$ yang menunjukkan ada hubungan yaitu pengetahuan anggota pemadam kebakaran tentang resusitasi jantung paru dengan keterampilan menolong korban henti jantung di Kabupaten Jember berkekuatan kuat dengan arah nilai *r* positif, hal tersebut perlu adanya pelatihan pada anggota pemadam kebakaran dalam memberikan pertolongan pertama pada korban henti jantung, agar memiliki kemampuan dalam menolong.

Kata kunci: Pengetahuan, Keterampilan Resusitasi Jantung Paru

The Correlation between the Firefighter Members' Knowledge about Heart-Lung Resuscitation and Skills in Giving Aid for the Cardiac Arrest Victim in Jember Regency

Xiv + 74 pages + 1 chart + 9 tables + 14 appendices

Abstract

The emergency was a sudden accident which could occurred anywhere and anytime and it was needed an immediate aid. A firefighter was an officer who had a role in giving the first aid for the victims of fire and one of them was an accident needed an immediate handling by giving Heart-Lung Resuscitation action. This research aimed to find out the correlation of the firefighter members' knowledge about heart-lung resuscitation and the skills in giving aid for the cardiac arrest victim by using correlation design and Cross Sectional approach. The population of this research was the firefighter members in Jember Regency totaling 52 members and the sample total was 46 respondents. The sample collecting techniques was using cluster sampling and determining the sample by using simple random sampling. The research result showed that the biggest total of the respondents who had a good knowledge was 27 respondents (58.7%) and the biggest total of the respondents who had good skill in giving aid for the cardiac arrest victims was 22 respondents (47.8%). The statistic test used was spearman rho test by 0.000 of p value and it was got the r value = 0.683 which showed that there was a correlation in the firefighter members' knowledge about heart-lung resuscitation and the skills in giving aid for the cardiac arrest victim in Jember Regency, it showed strongly and the r value direction was positive, so it was needed a training for the firefighter member in giving first aid of the cardiac arrest victim in order to have the ability in helping the victims.

Key words: knowledge, Heart-Lung Resuscitation skill
